| Engagement management and technical leadership for projects in the \$30,000 to \$1,000,000 range | Medium size robust LAN design and implementation |

Professional Experience

SilverStream Software, Inc., Billerica, MA

Sep 99-Present

Principal Engineer – As a technical leader in the development organization my primary responsibilities included product architecture and product development. I played a leadership role in the creation of the SilverStream eXtend Workbench (<http://extend.silverstream.com>) and was responsible for the initial architecture design of the eXtend Workbench with the creation of the SilverStream JSP Editor.

Additionally I participated in the creation of the SilverStream Application Server for J2EE versions 1.2 and 1.3 by writing the JSP compiler, building the J2EE Application Client container, and participating in the J2EE certification process.

Earlier, as a major contributor to the SilverStream Application Designer, I worked on the product core, ported the product to the Linux operating system, and wrote source control integration support, with drivers for the Rational ClearCase, Microsoft VSS, and Merant PVCS version control systems.

SilverStream Software, Inc., Burlington, MA

Nov 98-Sep 99

Consulting Engineer – As the third member of the services division, I helped grow the organization to over 150 employees. Created standards and best practices for the services organization. Worked as the account manager and lead architect on successful projects with companies such as: 3M, AAA, Hewlett Packard, JP Morgan, Nortel Networks, the State of North Dakota and the United States Navy.

Radnet, Inc., Cambridge, MA

Nov 97-Nov 98

Consultant - Technical lead for two-month to two-year intranet and extranet projects using Java and Webshare running on Sybase SQL Anywhere, Informix, MS SQL Server, and Oracle. Designed and implemented corporate standards for engagement management including project management, issue management, team management, and an extranet components allowing collaboration between Radnet and its customers. Pre-sales prototype, presentation, and engagement authorization production.

Radnet, Inc., Cambridge, MA

Feb 97-Nov 97

Information Systems Engineer - Designed and built Radnet's LAN and WAN architecture including organization of three corporate moves, connection to remote offices in Texas, New York, and California, and remote access solutions. Configured servers, hubs, routers, firewalls, and modem pools. Rollout of enterprise wide messaging, scheduling, and contact management. Creation of extranet and intranet. Creation and maintenance of WINS, DHCP, DNS, FTP, HTTP, SMTP, POP3, file, database, application, and development servers. Creation of Japanese, Chinese, NT and Unix development environments. Rollout of enterprise backup solutions.

Fulcrum Networks, Marblehead, MA

1996-1997

President and Cofounder - Started company including sales and marketing strategy, business strategy, legal agreements, and financial practices. Created two major web sites generating over 1,000,000 unique hits per year, with visitors from over 80 countries, and increasing client sales by over 250 percent.

Mycoff Advertising Inc., Salem, MA

1996-1997

Interactive Marketing Consultant - Designed and implemented on-line marketing strategies for Mycoff and their clients. Trained staff in HTML, Internet marketing, and adaptation of graphics for the world wide web. Creation of Mycoff's original internet presence.
